

Manage your data. See the true picture.

Data, the bloodstreams of organizations, bear the essential nutrients for the next business growth. Ensuring complete and quality data accurately delivered is paramount in any Business Analytics initiative.

Working with the state of the art SAS® tools and solutions, Emerio manages the entire lifecycle of data management from architecting and modeling to the building and commissioning of enterprise class data warehouses. Our SAS® experts develop simple and easy-to-understand data integration processes so you can have insights into data you can trust, to handle complex business challenges.

Benefits:

- Centralised data management with security and data integrity
- Ability to access almost any type of source data
- Self-service analysis with user friendly business data maps
- Ability to handle large amounts of data in a timely and accurate manner

Data Access

- Emerio offers seamless, transparent and secure data integration with fast performance and the ability to access more than 60 data sources of varied characteristics by engaging the capabilities of SAS® technology.

Data Quality

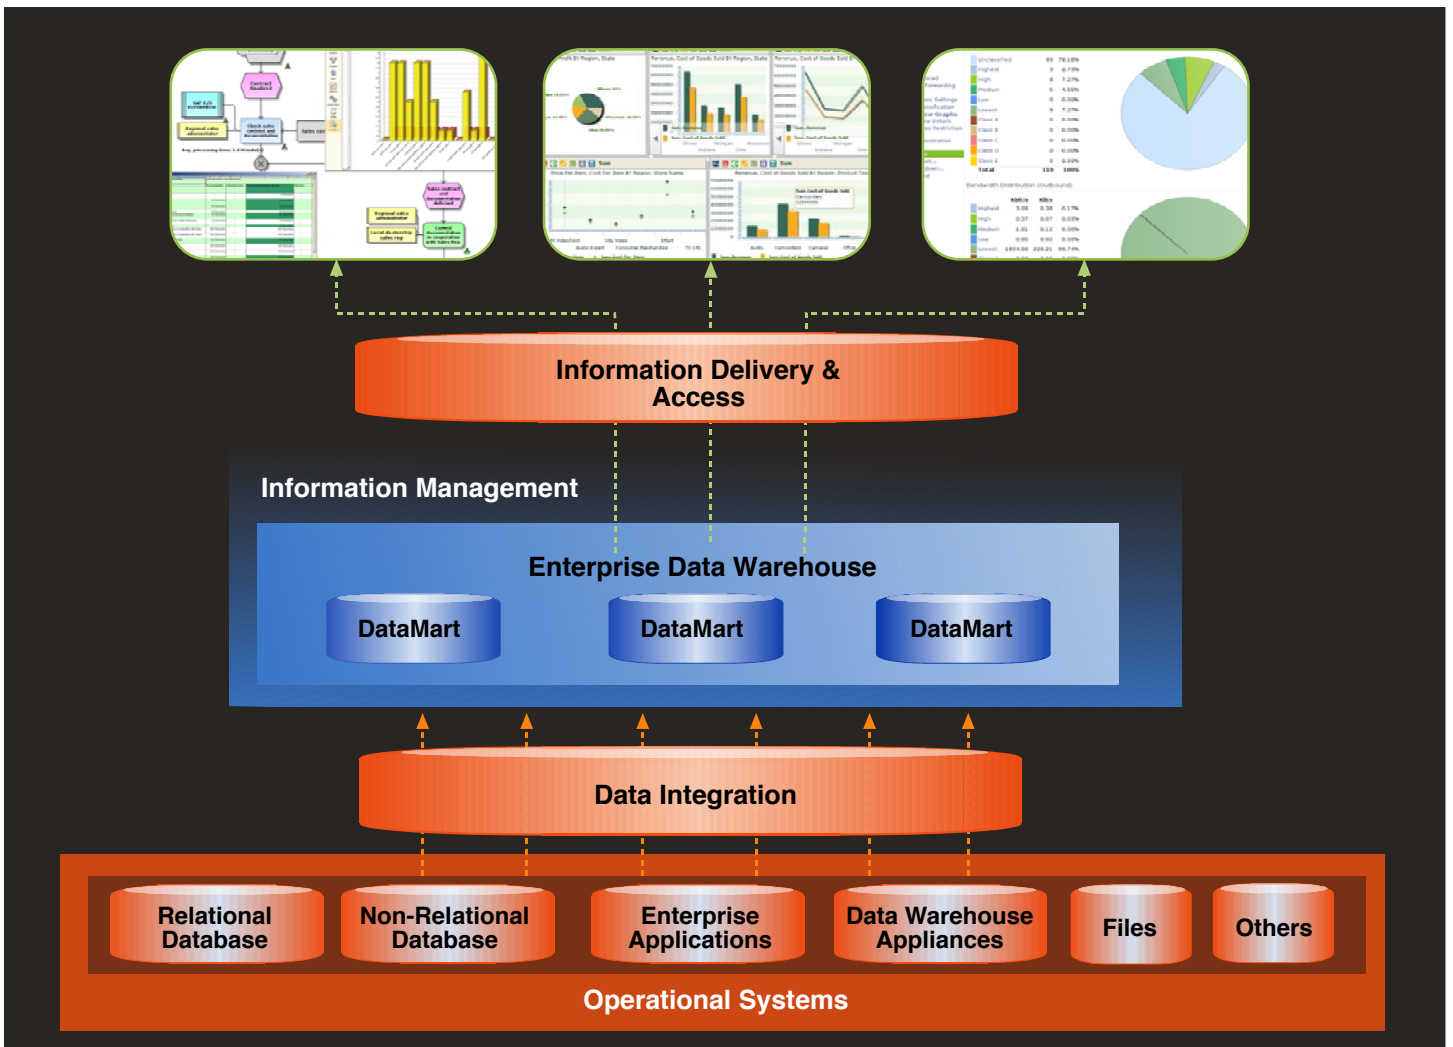

- From profiling your data with SAS® Data Quality Solution and SAS® DataFlux to performing data cleansing and standardization across multiple systems and business units, Emerio help customers realise the true potential of Data Quality offerings.

Data Integration and Data Warehousing

- **Data modeling** – Emerio architects the right data model, defines and implements the subject, dimensional and entity-relationship models, to significantly reduce the time and effort for these important activities that form the foundation of any data warehousing project.
- **Enterprise Data Integration** – Capitalizing on SAS® DI Studio, Emerio can simplify and create easy-to-maintain ETL processes and data warehouses for retrieving data from almost any source, transform and load into robust repositories of data. Coupled with our expertise in enterprise connectivity and metadata management, we provide the whole array of services in the Data Integration spectrum.

Business Data Management

- We empower business users to perform their own analysis by transforming complex data structures into user friendly business data maps, using SAS® Information Map Studio.

The Emerio Edge

- Demonstrated experience in designing custom data models and using out-of-the box models that simplify data transformation
- Expertise in performance tuning of jobs, programs and applications to handle high volumes of data
- Proven skills and methodologies distilled from our experiences in successful Data Management implementations
- Quality delivery that has earned numerous repeat orders from our customers
- Enhance IT delivery capabilities of progressive governments and enterprises
- Deeply rooted in South East Asia with established network of delivery centers
